Walk-in hours: Monday - Friday 9a.m. - 4p.m.
216-664-2555

This program is for opioid users who are at risk of death from opioid overdose and family and friends of those who are at risk of death from opioid overdose. Common opioids that are used are heroin, OxyContin, methadone, Percocet and Vicodin.

We will teach you how to recognize an overdose, how to respond to an overdose and how to administer intranasal naloxone to reverse an opioid overdose. We will distribute kits containing the lifesaving drug naloxone to all participants in the program free of charge.
