 Total Case

0  
 Outbreaks

0  
 Deaths

**Previous Week**

**Previous Week (ending 10/20/2018)**

- 0 new influenza diagnosis reported this week
- 100% of influenza hospitalizations are male, 0% female

## Influenza Vaccines

The flu is a contagious respiratory illness that is caused by more than one type of influenza virus strains. The flu can cause mild to severe illness in individuals and in some cases can lead to death. Certain individuals are at a high risk of developing complications from the flu, including the elderly, children, and people with chronic medical conditions (e.g. asthma or diabetes). Most people that are healthy will recover from the flu with no serious problems.

The Cleveland Department of Public Health offers several clinics for those who have insurance, are under-insured, or have no insurance. The clinics can help you get the influenza vaccine at little to no cost. The clinics listed below outline some times when you can get your vaccination.

Health Center	Address	Start Date	Hours	Phone
Thomas McCafferty	4242 Lorain Avenue	Starting Oct. 1 <sup>st</sup> EVERY MONDAY	8:30 AM – 11:30 AM	216-664-6603
J. Glen Smith	11100 St. Clair Avenue	Starting Oct. 4 <sup>th</sup> EVERY THURSDAY	8:30 AM – 11:30 AM	216-664-7095

**More than one peak of activity may be seen during influenza season, so any city resident over 6 months of age who has not been vaccinated this season should get the shot now to protect themselves from influenza.**

In addition to getting the influenza vaccine, follow these simple steps to help prevent the spread of the flu:

1. Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it
2. Wash your hands often with soap and water.
3. If you are sick with flu-like symptoms, stay home for at least 24 hours after your fever is gone.
