Current Week

Current Week (ending 01/12/2019)

- 22 new influenza diagnoses reported this week
- Influenza-like-illness (ILI) among emergency department visits: Elevated
- 0 influenza-associated pediatric mortalities reported this week
- 43% of influenza hospitalizations are male, 57% female.

Current Season Summary

Previous Week

Previous Week (ending 01/05/2019)

- 34 new influenza diagnoses reported this week
- Influenza-like-illness (ILI) among emergency department visits: Elevated
- 0 influenza-associated pediatric mortalities reported this week
- 43% of influenza hospitalizations are male, 57% female.

Influenza Activity in Ohio and City of Cleveland

Influenza activity was classified as "widespread" throughout Ohio during Week 2 (ending 01/12/2019). Through Week 2 of this influenza season, Ohio Department of Health (ODH) reported zero pediatric influenza-associated mortalities among patients under age 18 years. Public health surveillance data sources indicate low intensity for influenza-like illness (ILI) in outpatient settings reported by Ohio's sentinel providers. Ohio Department of Health has reported an additional 365 influenza-associated hospitalizations this week, bringing the season (2018-2019) total to 1258 influenza-associated hospitalizations. State, Regional and National data is provided by the Ohio Department of Health, ODH Influenza Activity Summary MMWR 2.

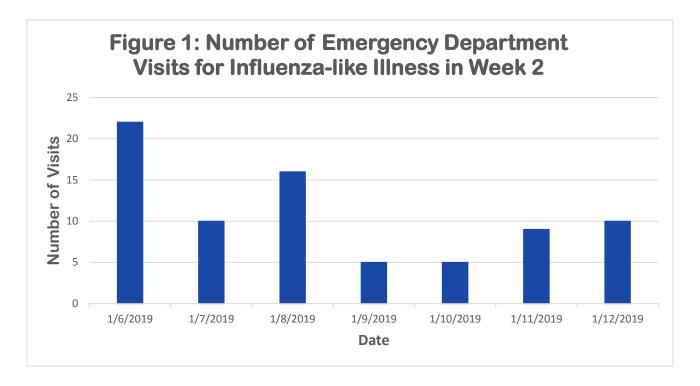

In the City of Cleveland activity slightly decreased from Week 1 (ending 1/05/2019). More than one peak of activity may be seen during influenza season, so **any City** resident over 6 months of age who has not been vaccinated this season should get the shot now to protect themselves from influenza.

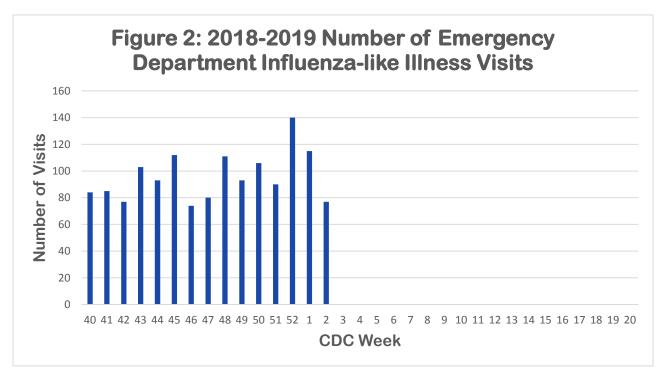

Influenza Detections Reported, 2018-2019*						
Positive Test Type/Subtype	Week 2	Total To-Date				
Influenza A†	19	112				
Influenza A (H1N1) Pandemic 2009	0	5

Influenza B/Yamagata	0	0				
Influenza A/B†	0	0				
Influenza Subtype Unknown	0	0				
Total	22	136				

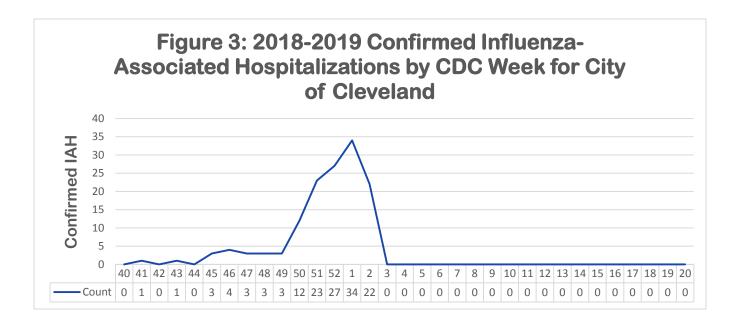

^{*}Data from CDC Week 40 to Week 15.

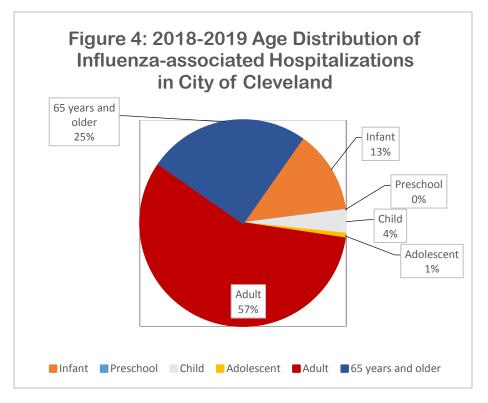

Note: Totals may change due to further laboratory findings

[†]No further characterization performed.

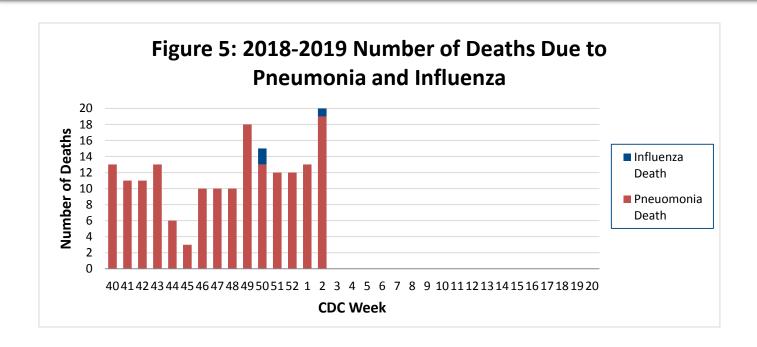

Infant: 0-2 years old
Preschool: 3-5 years old
Child: 6-12 years old

Adolescent: 13-17 years old **Adult**: 18-64 years old

65 years and older

Infant	Preschool	Child	Adolescent	Adult	65 years and older
18	0	5	1	78	34

Pneumonia and Influenza Deaths, 2018-2019*							
Age Category	Week 1		Total To-Date				
	Pneumonia	Influenza	Pneumonia	Influenza			
Under 1	0	0	1	0			
1-14 years	0	0	0	0			
15-24 years	0	0	1	0			
25-44 years	1	0	4	0			
45-64 years	3	0	30	1			
65-74 years	4	0	36	0			
75 years and older	11	1	100	2			
Unknown	0	0	0	0			
Total	19	1	174	3			

^{*}Data from CDC Week 40 to Week 15.

Note: Totals may change due to further laboratory findings

Note 2: Location of death is in Cleveland, Ohio – not home residence location.

[†]Data from Cleveland Department of Health Vital Statistics Department.

Influenza Reporting in the City of Cleveland

Local providers are encouraged to report laboratory positive influenza detections to Katie Romig, Chief Epidemiologist by FAX 216-664-6159. Please fax a <u>Case Report Form</u> and/or a printed laboratory result, and indicate if the patient was admitted to the hospital, and/or is a resident of a congregate living facility.

For questions regarding the influenza watch summary please call Katie Romig at 216-420-7743 or email to: kromig@city.cleveland.oh.us
