The purpose of the weekly *Influenza Watch* is to summarize current influenza surveillance in the City of Cleveland. *Please note that reported weekly data are preliminary and may change due to delayed submissions and additional laboratory results.*

### Current Week (ending 05/11/2019)
- 3 new influenza diagnoses reported this week
- Influenza-like-illness (ILI) among emergency department visits: *Minimal*
- 0 influenza-associated pediatric mortality reported this week
- 33% of influenza hospitalizations are male, 66% female.

### Current Season Summary
- **533 Total Cases**
- **1 Outbreak**
- **1 Death***

*Refers to a Influenza-associated Pediatric Mortality

### Virus Characteristics
- **Influenza A**
- **Influenza A (H1N1) pdm09**
- **Influenza A (H3) Seasonal**
- **Influenza B**
- **Influenza B/Yamagata**
- **Influenza A & B**
- **Influenza Subtype Unknown**

### Previous Week (ending 05/04/2019)
- 3 new influenza diagnoses reported this week
- Influenza-like-illness (ILI) among emergency department visits: *Minimal*
- 0 influenza-associated pediatric mortality reported this week
- 66% of influenza hospitalizations are male, 33% female.
Influenza Activity in Ohio and City of Cleveland

Influenza activity was classified as “regional” throughout Ohio during Week 19 (ending 05/11/2019). Through Week 19 of this influenza season, Ohio Department of Health (ODH) reported four (4) pediatric influenza-associated mortalities among patients under age 18 years. Public health surveillance data sources indicate minimal intensity for influenza-like illness (ILI) in outpatient settings reported by Ohio’s sentinel providers. Ohio Department of Health has reported an additional 20 influenza-associated hospitalizations this week, bringing the season (2018-2019) total to 9828 influenza-associated hospitalizations. State, Regional and National data is provided by the Ohio Department of Health, ODH Influenza Activity Summary MMWR 19.

In the City of Cleveland activity remained the same from Week 18 (ending 05/04/2019). More than one peak of activity may be seen during influenza season, so any City resident over 6 months of age who has not been vaccinated this season should get the shot now to protect themselves from influenza.

Influenza Reporting in the City of Cleveland

Local providers are encouraged to report laboratory positive influenza detections to Katie Romig, Chief Epidemiologist by FAX 216-664-6159. Please fax a Case Report Form and/or a printed laboratory result, and indicate if the patient was admitted to the hospital, and/or is a resident of a congregate living facility.

For questions regarding the influenza watch summary please call Katie Romig at 216-420-7743 or email to: kromig@city.cleveland.oh.us
