

November 22, 2023 MMWR Week 46 November 12<sup>th</sup> – November 18<sup>th</sup>, 2023

### Week 46 Highlights

The weekly Influenza Watch summarizes the flu surveillance in the City of Cleveland. The metrics in this report include the number and percentage of emergency department visits for influenza-like illness, confirmed hospitalizations for the flu, and the deaths each week due to pneumonia and influenza.

- This week, flu activity is classified as "Low"
- 5.41% of the 333 deaths reported were due to pneumonia. One influenza death was reported this week, and there has been 1 influenza death so far this season.
- There were 3 confirmed cases of influenza-associated hospitalization reported this week.
- 1.66% of emergency department visits were for flu-like illness

#### Flu Intensity: Low

#### Seasonal Flu Intensity

C	let			N	lov				D	ec			Ja	an			F	eb			M	lar			Α	þr				Ma	ау	
40	41	42	43	44	45	46	47	48	49	50	51	52	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20

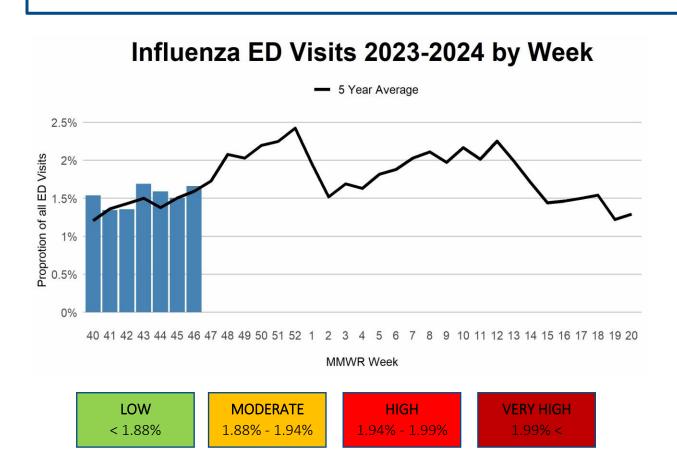

COVID-19 & Influenza (Flu) Intensity Indicators	This Week n (%)	Activity Compared to Last Week	Season Total n (%)			
Emergency Department visits for Influenza-Like Illnesses	68 (1.66%)	+0.16%	432 (1.53%)			
Confirmed Influenza Hospitalizations <sup>¥</sup>	3	+1	5			
Confirmed COVID-19 Hospitalizations	9	+5	47			
Pneumonia- & Influenza-Related Deaths	19 (5.71%)	+2.38%	89 (4.26%)			

<sup>\*</sup>Deaths represent all deaths for Cuyahoga County. All other data presented are City of Cleveland-specific Data are preliminary and subject to change as more information is gained.

The three indicators for calculating the intensity thresholds are based on 2017 methodology from the Centers for Disease Control and Prevention.

November 22, 2023 MMWR Week 46 November 12<sup>th</sup> – November 18<sup>th</sup>, 2023

#### Influenza-Like Illnesses

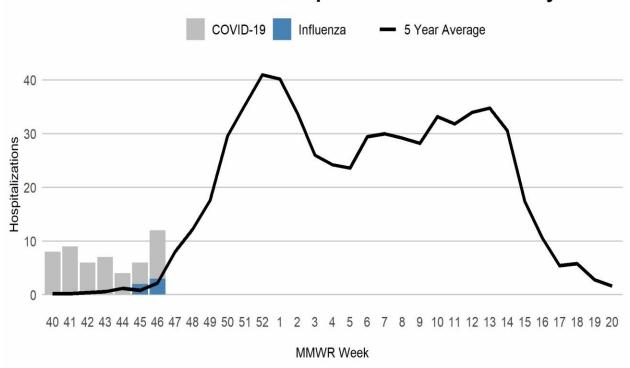

The proportion of Emergency Room visits for influenza-like illnesses is under the low threshold and comparable than the 5-years average. This week, 53% of visits were among females. Regarding race and ethnicity, 37% of visits were Black or African American individuals; 32% were among White individuals; and 31% of visits were among other racial groups. About a quarter (26%) of visits were among Hispanic or Latin individuals. The median age this week is 4.5 years.

Data Source: Health Monitoring Systems: EpiCenter 3.5.18. Data extracted on 11/22/2023. Low, Moderate, and High intensity thresholds are defined as the 50%, 90%, and 99% Confidence Intervals, respectively, based on the 5-Year Average of previous seasons

November 22, 2023 MMWR Week 46 November 12<sup>th</sup> – November 18<sup>th</sup>, 2023

## Influenza or COVID-19-Associated Hospitalizations

#### Influenza and COVID-19 Hospitalizations 2023-2024 by Week

There have been 3 Influenza-Associated Hospitalizations (IAH) reported this week among individuals aged 30 to 68 years. This marks a notable increase from the previous week, bringing the total influenza-associated hospitalizations for the season to five. COVID-19 has accounted for more hospitalizations so far this fall. COVID-19 hospitalizations have increased this week compared to last week, with nine reported during the current reporting week. These hospitalizations were among Cleveland residents aged 4 to 85 years.

Data Source: Ohio Department of Health: Ohio Disease Reporting System. Data extracted on 11/22/2023. Data are preliminary and subject to change as more information is gained.

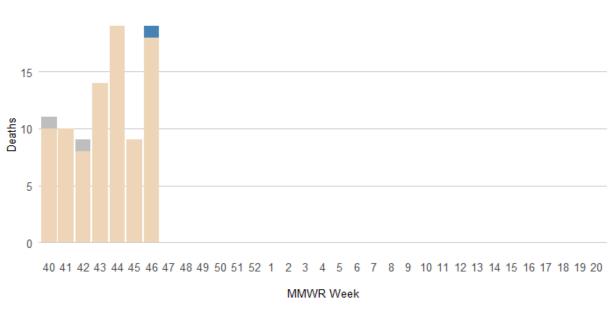

Low, Moderate, and High intensity thresholds are defined as the 50%, 90%, and 99% Confidence Intervals, respectively, based on the 5-Year Average of previous seasons.
