

The Respiratory Report summarizes influenza, COVID-19, and Respiratory Syncytial Virus (RSV) activity in the City of Cleveland during each week of respiratory illness season. Respiratory illness season starts at the beginning of October (MMWR week 40*) and lasts until mid-May the following year (MMWR week 20).

Week 47 Summary

- 1.2% of emergency department (ED) visits were for influenza-like illnesses (ILI) with fevers. 67% of these visits were for children age 9 and younger.
- There was 1 hospitalization for RSV, 2 for COVID, and 2 for influenza reported this week. Hospitalization and death data often experience a delay in reporting, so more data for this week may appear on future reports.

1

death linked to upper
respiratory illness this season

Metric	Count This Week (% of total ED visits)	Compared to Last Week	Season Total (% of total)
ED Visits for ILI + Fever	64 (1.2%)	+0 (0% change)	497 (1.2%)
Influenza Hospitalizations	2	--	5
COVID Hospitalizations	2	-3	17
RSV Hospitalizations	1	--	1

*An MMWR week is the CDC's standard weekly calendar for tracking health data. Each week runs Sunday to Saturday. Each year, Week 1 is the week containing the first Thursday of January.
Data extracted on 11/25/2025. Data are preliminary and subject to change.

Emergency Department (ED) Visits

Percentage of ED visits for ILI + Fever by MMWR Week, 2025–2026
