The purpose of the COVID-19 Watch is to summarize the coronavirus surveillance and vaccine uptake in the City of Cleveland, Ohio. This report uses data available through December 5, 2023. Data on COVID-19 case demographics focus on the last four full weeks prior to publication (November 5 - December 2, 2023).

What Matters Most

1. Cleveland COVID-19 activity increased during the past four weeks with an average 7-day incidence rate of 73 new cases per 100,000 residents. This is comparable to state-wide COVID-19 activity during the same time frame which, averaged a 7-day incidence rate of 52 new cases per 100,000 residents.
2. As of December 5th, 59.1% of Cleveland residents have received any dose of a COVID-19 vaccine, 51.3% have completed their primary vaccination series, and 27.2% have received a booster dose. Appointments for adults and children can be made visiting gettheshot.coronavirus.gov.
3. Cleveland Department of Public Health recommends the new booster to better protect patients from the new COVID-19 variants. The new boosters are available for everyone 6 months and older protect against serious outcomes of COVID-19 this fall and winter.
4. The Omicron subvariant JN.1 is an emerging strain that is causing new infections within our region. This variant is responsible for an increasing percentage of new cases within our region. Like other Omicron subvariants it does not appear to be causing more severe illness than previous strains.
5. People without health insurance or with health plans that don't cover the cost can get a free vaccine from their local health centers and pharmacies participating in the CDC's Bridge Access Program. Visit vaccines.gov to find participating providers.

* Figures represent the total number of cases, hospitalizations and deaths in the City of Cleveland since February 15, 2020.

** Vaccine data were exported from the DataOhio Portal on December 5, 2023. The vaccine summary includes vaccinations administered to Cleveland residents by any supplier.

Completed: The number/percentage listed is the individuals who have completed a COVID-19 vaccine primary series. This includes one dose of a single-dose vaccine (Janssen) or all required doses in a primary series (Pfizer, Moderna, Novavax).

Boosted: The number/percentage listed are those who have received either an additional dose in their primary series or an updated bivalent booster dose of a COVID-19mRNA vaccine on or after Sept. 1, 2022

*** Final cause of death can take weeks to determine. The number of deaths in previous weeks are subject to change as more information becomes available from Ohio Department of Health.

Cleveland Department of Public Health
75 Erieview Plaza, Floor 3
Cleveland, Ohio 44114
Office: 216-420-7743
Fax: 216-664-6159

The total Cleveland population of 383,331 along with the age, race, sex, and ethnicity data are estimates reported by the US Census Bureau 2020. There are no estimates for "Unknown" or "Other" sex and age groups, so percent of population cannot be calculated for these groups. Data for % Vaccinated out of total population graphs can be read, for example, "79.5 % of the 70-79 year old population in Cleveland have received at least one dose of the COVID-19 vaccine". Sex graphs does not include 1,906 "unknown" and 65 "other".

Metadata

The Cuyahoga County numbers are approximate and have been populated using the DataOhio Portal.

This data report reflects the period starting from February 15, 2020 through December 2, 2023 for the City of Cleveland, Ohio.

Total Cases represent confirmed and probable cases.

Cleveland City data and Cuyahoga County data are compiled on December 5, 2023 using the DataOhio Portal.

Population and demographic data are from the US Census Bureau's 2020 estimates.

Data is preliminary and subject to change.

There may be a delay in reporting.

Data is reported by test date. If test date is unknown, the date a case is reported to Ohio Department of Health is used as a substitute for the test date. The number of cases can vary based on dates used for analysis.
